## *A signage solution for unique environments*

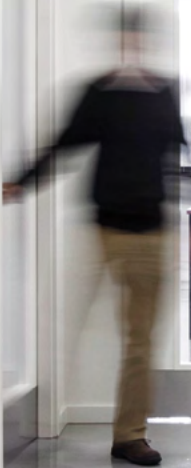

The Excellence by Everlux signage range is an exclusive and luxurious alternative to traditional safety signage. Created whilst combining key values such as aesthetic consideration, individual perception, and ambience, Excellence by Everlux signage offers a different solution for those with a discerning eye.

*Elegant signage in  
harmony with its  
surrounding  
environment*

Compliance with safety signage  
legislation does not necessarily  
have to result in a sacrifice to  
aesthetical considerations.

*Safety signage  
that merges into  
its surroundings.  
Excellence by  
Everlux*

Utilises unique and contemporary base materials that create the impression of the signage being framed.

## *The art of safety*

→ The Excellence by Everlux signage system represents the perfect fusion between safety signage and prestige interior environments.

## Contemporary and classic base materials

Excellence by Everlux considers a sign to be a decorative element within itself that should remain in harmony with the environment it shares.

*Materials*

## ***Transparent (Crystal)***

**Photoluminescent transparent acrylic:** 5mm thickness with finished edges and rounded corners. Superior impact resistance and lower net weight than glass.

**Brushed stainless steel installation accessories:** 14mm dia. that allow the sign to stand proud from the wall by 17mm.

***Acrylic***

## Acrylic

## Opaque (Frosted)

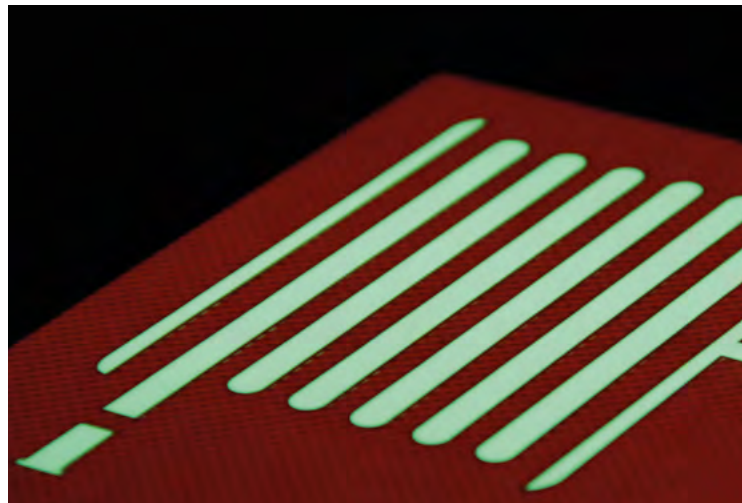

**Photoluminescent opaque acrylic:** 5mm thickness with finished edges and rounded corners. Superior impact resistance and lower net weight than glass.

**Brushed stainless steel installation accessories:** 14mm dia. that allow the sign to stand proud from the wall by 17mm.

## Acrylic

## White

➤ **Photoluminescent white acrylic:** 5mm thickness with finished edges and rounded corners. Superior impact resistance and lower net weight than glass.

**Brushed stainless steel installation accessories:** 14mm dia. that allow the sign to stand proud from the wall by 17mm.

## Acrylic

### Black

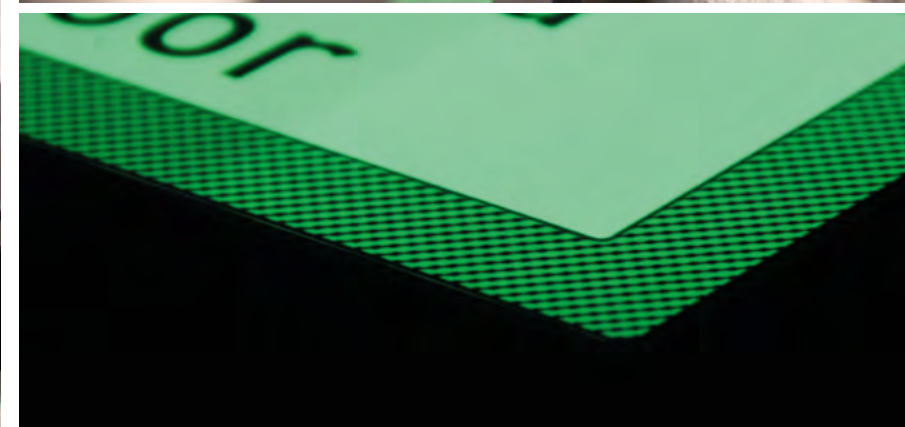

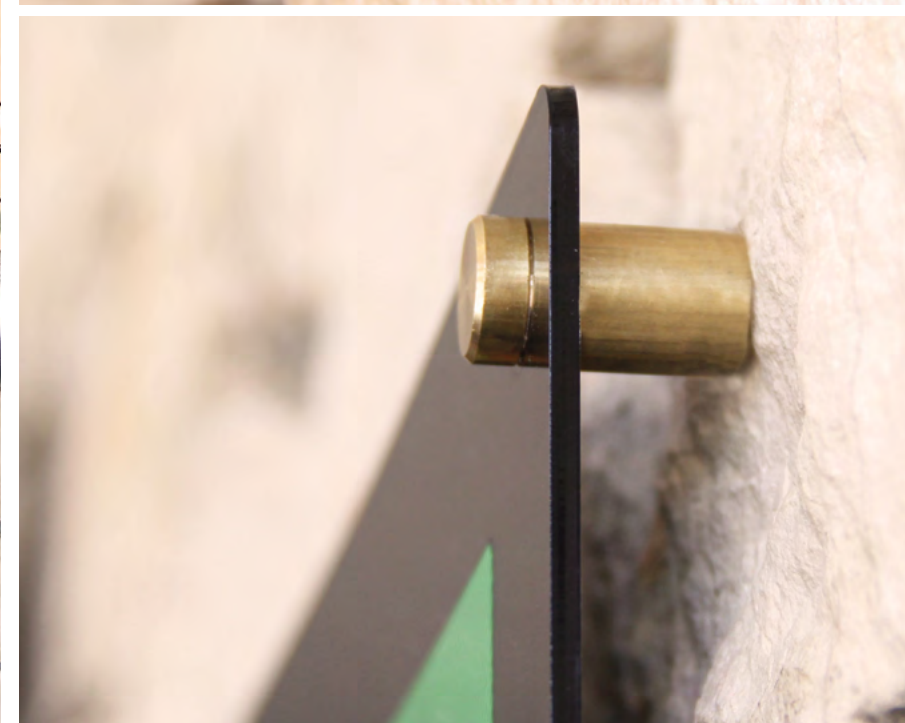

**Photoluminescent black acrylic:** 5mm thickness with finished edges and rounded corners. Superior impact resistance and lower net weight than glass.

**Black stainless steel installation accessories:** 14mm dia. that allow the sign to stand proud from the wall by 17mm.

## Acrylic

### Mirror Bronze

← Photoluminescent bronze effect mirror finish acrylic: 3mm thickness with finished edges and rounded corners. Superior impact resistance and lower net weight than glass.

Brass installation accessories: 14mm dia. that allow the sign to stand proud from the wall by 17mm.

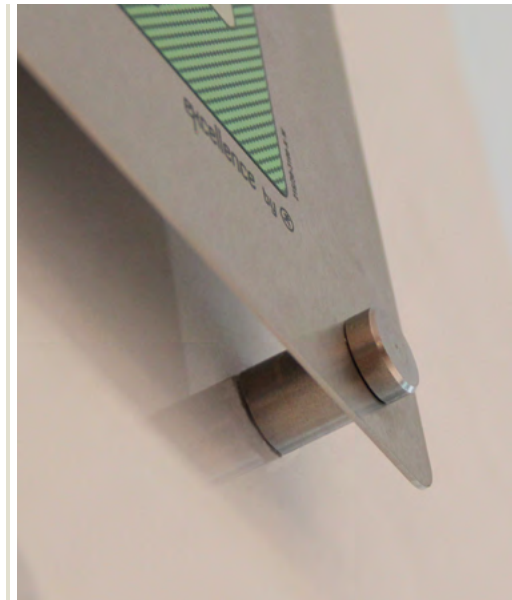

## *Metallic*

### ***Brushed Stainless Steel***

◀ **Photoluminescent brushed stainless steel:** 1mm thickness with finished edges and rounded corners. Offering corrosion & abrasion resistance and anti-static properties.

**Brushed stainless steel installation accessories:** 14mm dia. that allow the sign to stand proud from the wall by 17mm.

## *Metallic*

### *Brass*

**Photoluminescent brass:** :  
1mm thickness with finished  
edges and rounded corners.  
Allows a stylish alternative  
for classic and formal  
interiors.

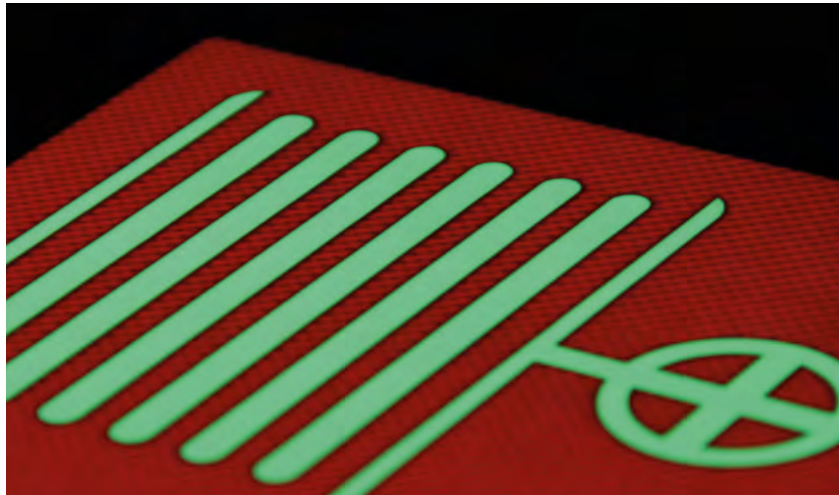

**Brass installation  
accessories:** 14mm dia.  
that allow the sign to stand  
proud from the wall by  
17mm.

# Photoluminescent pigments

→ Excellence by Everlux signage uniquely incorporates innovative technology featuring coloured photoluminescent pigments. These allow for high visibility and recognition of the pictogram and it's meaning as the colours are also visible in the absence of and/or a reduction in the available light.

Excellence by Everlux benefits from innovative technology with a patented manufacture process that allows for the full illumination of the **green, red and blue** safety colours when light sources are diminished or removed altogether.

Photoluminescent properties	
Time	Luminance intensity
10 min.	215 mcd/m²
60 min.	30 mcd/m²
Autonomy	
3100 min.	0.3 mcd/m²

excellence by you

# A customised solution for your unique requirements

- Sizes

- Accessories

We recognise that it is the finer details that can have a marked impact on an environment's aesthetics.

The **Excellence by Everlux** range offers a broad range of tailored options that allow **base materials, sign size and fixing systems** to be utilised to your personal specification.

**Excellence by Everlux** provides evolving innovation for the total satisfaction of your requirements and allows for the flexibility to develop and create alternative products to those featured.

► Acrylic sign with a realistic wood effect vinyl coating. In addition to a variety of wood effect textures, a broad range of alternative coatings are also available. These include metallic, stone, fabrics and fur amongst many others. They provide an extraordinarily realistic effect and allow for almost limitless creative flexibility.

► Acrylic sign with a Mirror Bronze finish. This sign is supplied without holes and is affixed using adhesive.

The **Excellence by Everlux** range also offers a spacing accessory which allows the sign to stand proud from the wall. (please refer to page 50)

► Acrylic sign with an Opaque finish. Supplied in a special size of 120x120mm with rounded corners, 5mm thick with a narrow 15mm border encapsulating the pictogram. This sign is supplied without holes and is affixed using adhesive.

The **Excellence by Everlux** range also offers a spacing accessory which allows the sign to stand proud from the wall. (please refer to page 50).

## //How to create Excellence

### Signage

1 - Select the base material  
Acrylic: Opaque (Frosted), Transparent (Crystal), White, Black, or Mirror Bronze;  
Metallic: Brushed Stainless Steel or Brass.

2 - Select the 5 digit individual sign reference number which can be found below each specific sign image.

#### Ordering Example:

To order sign reference number XU 010 with a Brushed Stainless Steel base material please specify:  
XU 010 Brushed Stainless Steel

### Accessories

Please Note: Most **Excellence** signs are supplied with 4 x 11 mm diameter holes pre-drilled. Installation **accessories are not included** and must be ordered separately.

Type 3 installation accessories are supplied with 2 x 750 mm stainless steel cables.

1 - Choose the sign base material and refer to the table shown above.

#### Ordering Example:

To suspend sign XU 010 in Brushed Stainless Steel from a ceiling (Type 3) using Brushed Stainless Steel installation fittings please specify: x1f3s - if Standard Sign; x2f3s - if Double-sided Sign;  
(please refer to the table above)

To install XU 120 in Acrylic perpendicular to the wall (Type 2 - Double-Sided) with Black Stainless Steel installation fittings please specify: x22ba  
(please refer to the table above)

To install a wall mounted (Type 1 - Drill Fixing) XU 125 in Brass sign with Brass installation fittings please specify: x11gb  
(please refer to the table above)
