

Environmental Sustainability Commitment

Ⓡ Sinalux® Ⓡ Everlux®

Sinalux/Everlux seeks to develop its activity in a sustainable way, developing, producing, and placing on the market products of high quality and environmentally sustainable, through processes continuously improved and increasingly efficient in the use of energy and resources.

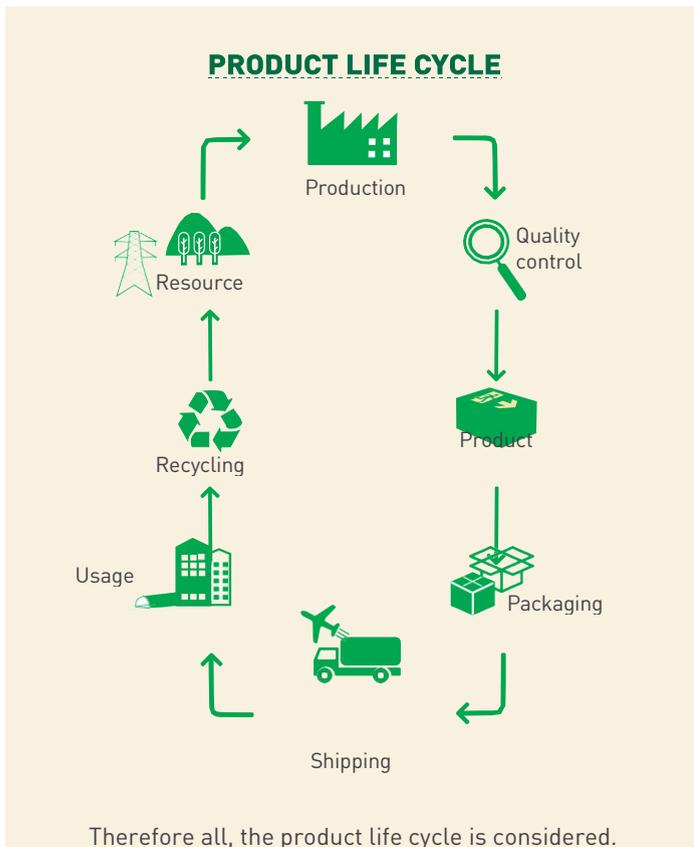

The manufacturing processes used for **Sinalux/Everlux** products have been continuously improved to maximize their efficiency. The more efficient the processes are, the lower impact on the environment they will have.

All environmental impacts are managed and, in this context, **Sinalux/Everlux** looks for partnerships with entities, with whom we can work on the best solutions viable, from an economically and environmental point of view.

Sinalux/Everlux recognizes that even indirect activities and processes can have an impact on their environmental performance.

Our products packaging which ensures the preservation of the product during the transportation to our customers, is also produced with recyclable materials and can be reprocessed for the manufacture of new materials.

Our environmental management system is certified according to the **ISO 14001** reference standard, which demonstrates our total commitment to the environment and sustainability.

By being associated with the United Nations Global Compact movement, **Sinalux/Everlux** once again demonstrates its environmental policy, aligning its operations and strategies with the **10 Principles of the United Nations Global Compact** in the areas of the environment, human rights, labour and anti-corruption.

The environmental culture is strongly lived in the company's activity!

All employees are integrated in this commitment to sustainability and continuous improvement, and demonstrate this in the process, the product and the service.
